

Instructions for the use of Bioclear Max Strength Skin Tag Remover Oil

**CLINICALLY TESTED AND EVALUATED.
EFFECTIVE, SAFE AND EASY TO APPLY.**

ADVICE BEFORE APPLICATION

- We advise you to do a patch test the skin for 24 hours to ensure there is no sensitivity to the oil. Simply apply a small amount of oil onto the skin and wait 24 hours. If no adverse reaction occurs, continue with use.
- If you are unsure if what you have is a skin tag, we advise you to seek professional health guidance before using BioClear.

Instructions

1. Ensure the skin is dry and clean.
2. Open the cap on the bottle - be aware that there will be oil on the brush applicator. Drop any drips of oil back into the bottle before applying.
3. Gently dab the brush applicator onto the skin tag until the oil has covered it.
4. With a clean, dry finger, gently massage the oil into the skin tag for a few seconds. Wash hands.
5. Repeat the process 3 times a day (morning / dinner / before sleep).

Results:

Small tags may take between 3 to 6 weeks to dry out and drop off, leaving fresh new skin beneath.

For larger skin tags, it may take a little more time to dry and fall. But the result will be the same.

Tips for application:

- i. Wipe away excess oil from surrounding skin with a damp cloth.
 - ii. Remember to massage the oil deep into the skin tag - this will quicken the process
 - iii. If the skin tag is under the arm or rubs against another part of the body we suggest placing a plaster over the skin once you've applied the oil. This will ensure that the oil doesn't rub off.
 - iv. Don't forget to apply the oil 3 times a day.
-

Safety information:

- *Keep away from eyes.*
- *Rinse eyes immediately if the product comes into contact with them.*
- *Keep away from children.*
- *Discontinue to use the product if you experience symptoms of irritation or allergic skin reaction (redness or itching).*
